Project Title:

HOTEL MANAGEMENT SYSTEM

Short Description:

A web-based Hotel Management System aimed at increasing hotel operations' efficiency and maximizing guests' satisfaction. The system provides secure authentication, personalized dashboards, and efficient management tools to two types of users. Customers can browse rooms, check availability upon dates, make or cancel bookings, submit reviews, and check billing information. Administrators can manage room types, supervise housekeeping staff status, manage customer profile and booking, monitor billing, create promotions or discounts, etc. It thus ensures an uninterrupted, organized, and easy hotel operation for both guests and staff.

Type of user: 1.User1, 2. User2

Common Features (Available to All Users)

- **Authentication**
  1. Login to the system
  2. Logout from the system
  3. User registration
- **Account Management**
  1. Change or reset password
  2. Manage profile information (view, edit, delete)
- **Dashboard**
  1. Access a personalized dashboard after login

Specific Features by User Type

- **Features of User1(Customer)**
  1. Browse Room Types & Amenities (Including Dates)
  2. Make Bookings
  3. Cancel Bookings
  4. Submit and View Reviews
  5. View Billing Summary & Invoices
- **Features of User2(Admin)**
  1. Manage room types and room details
  2. Monitor housekeeping staff status
  3. Handle customer profiles and bookings
  4. View billing information
  5. Manage promotions and discounts
