Project Description

Hotel Management System Admin:

A. Homepage (Guest/Public View)

The homepage serves as the primary landing page for users with a clean, modern interface featuring a hotel background and the tagline "Travel More, Spend Less".

- **Key Features:**
  - **Navigation:** Options to "Sign In," "Register," or "Login as Admin".
  - **Services Highlighted:** Showcases "Premium Rooms" (suites and standard), "Seamless Control" (management tools), and "Secure Booking".
  - **Feedback Form:** A dedicated section at the bottom for guests to submit their name and feedback to improve service.

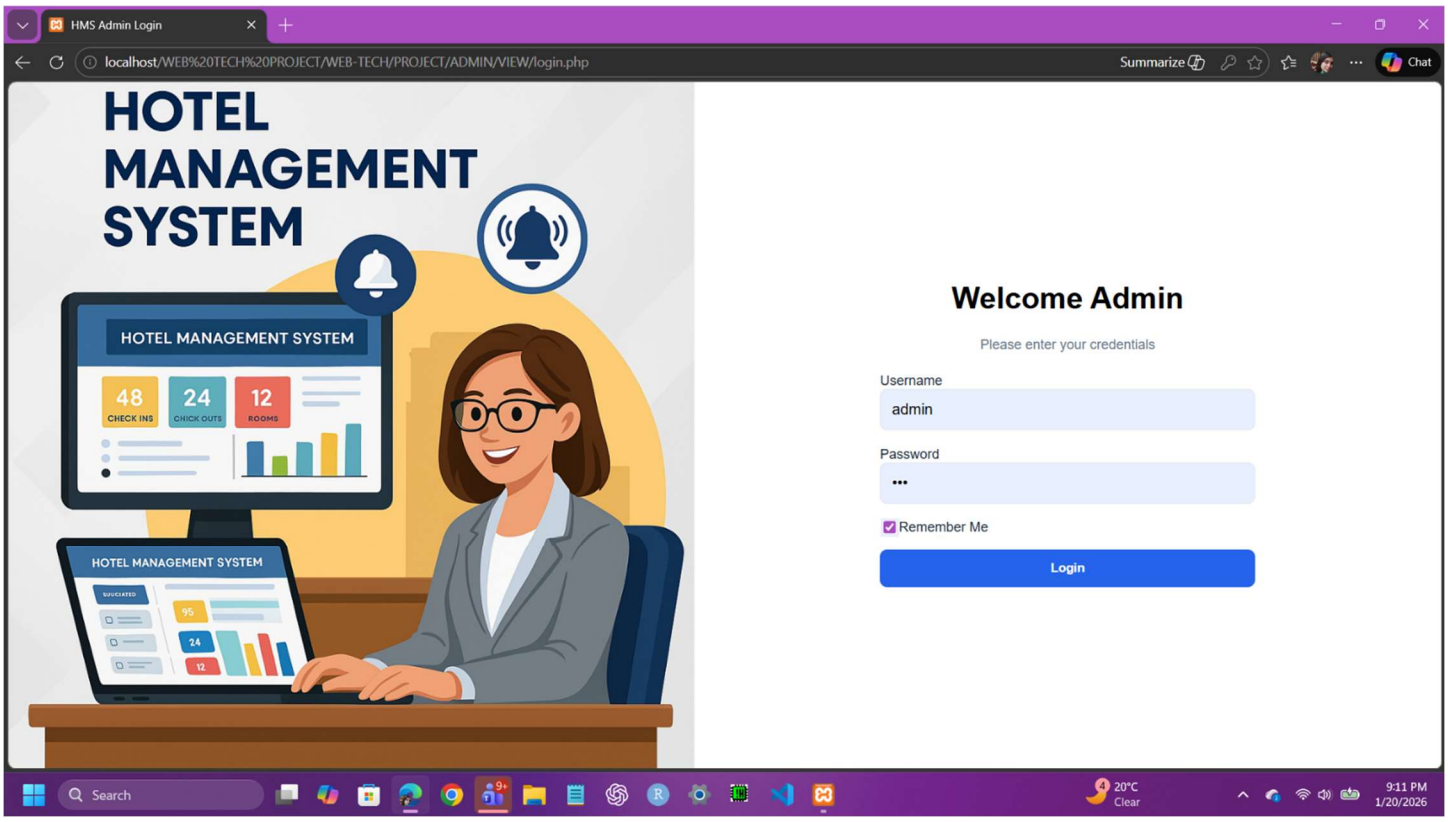
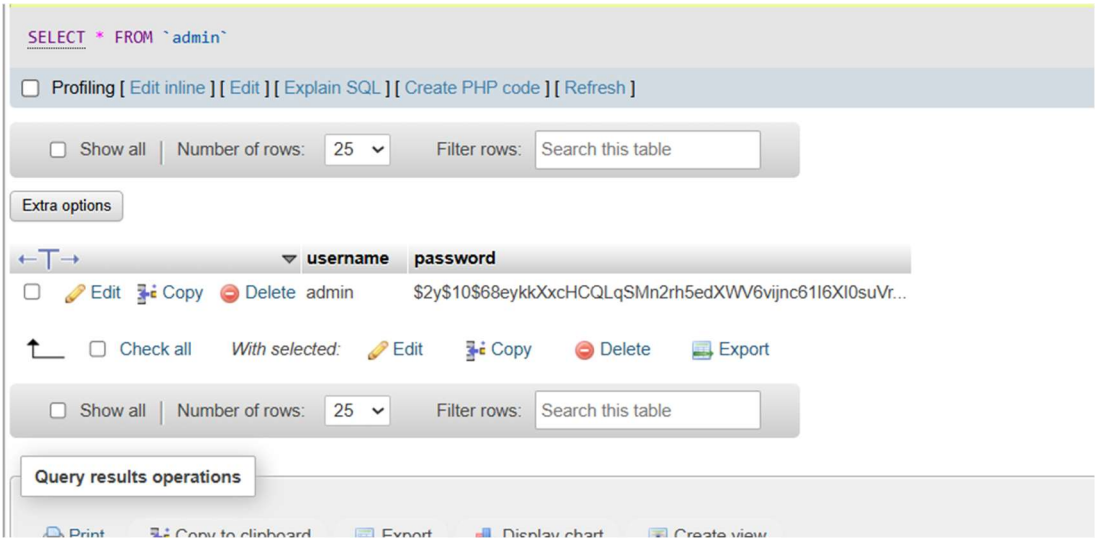
B. Admin Login Page

A secure portal for hotel staff and administrators to access the management dashboard.

- **Key Features:**
  - **Authentication:** Fields for Username and Password with a "Remember Me" option.
  - **Visual Aids:** Includes an illustrative graphic of an administrator managing data via multiple screens.

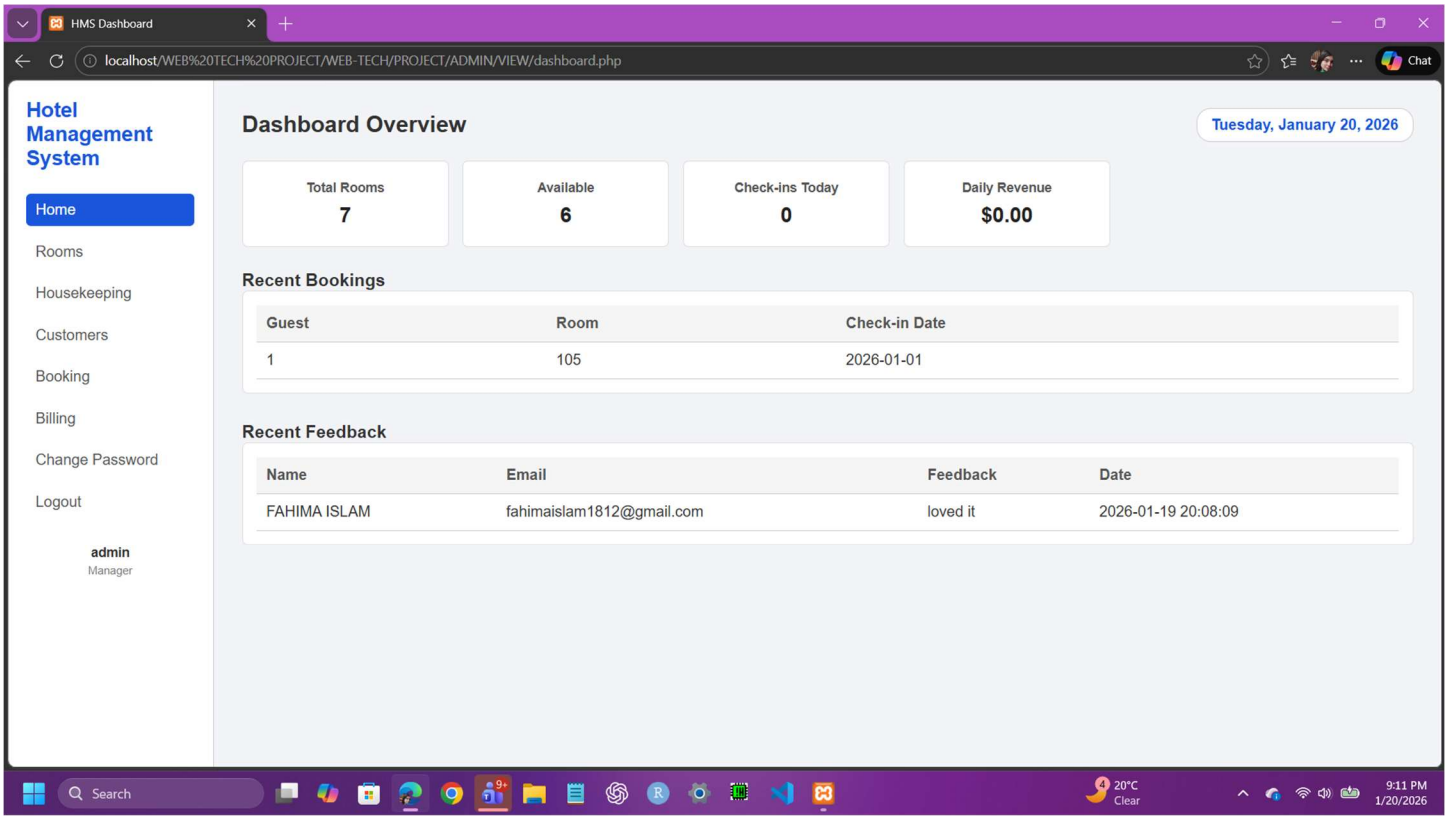


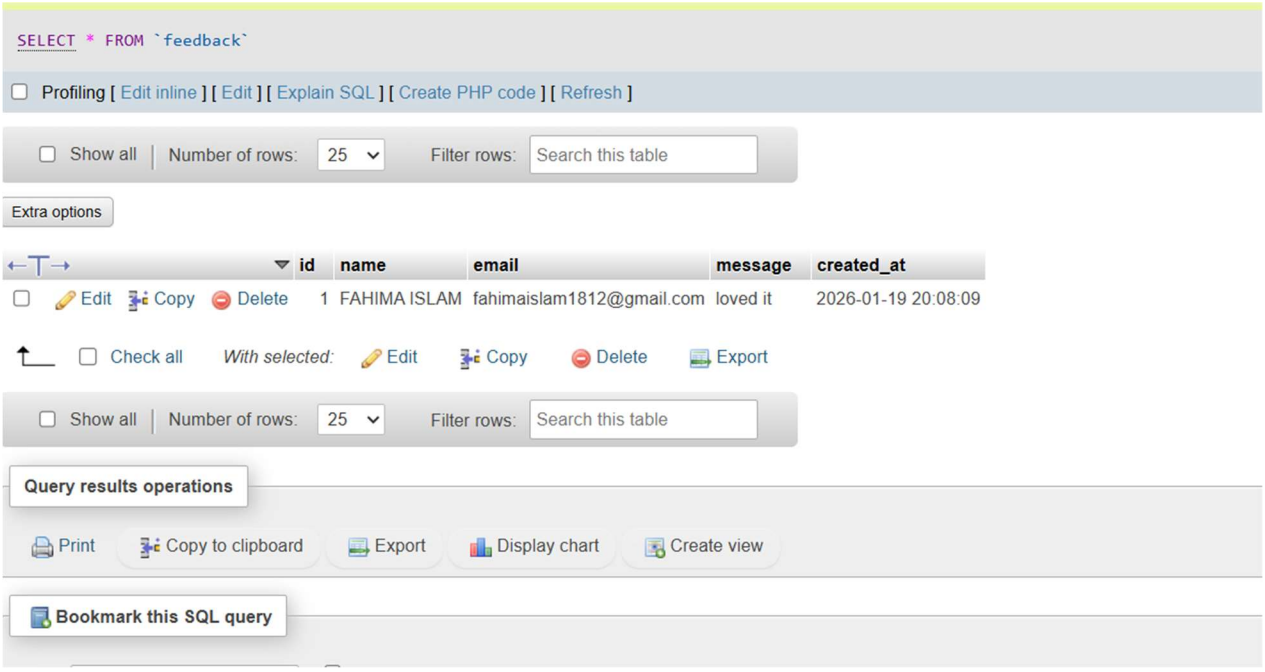


C. Admin Dashboard Overview

The central hub for administrators to monitor hotel performance at a glance.

- **Key Features:**
  - **Summary Statistics: Displays total rooms (7), daily revenue ($0.00), and check-ins today.**
  - **Live Metrics: Shows counts for "Available" rooms (6) and "Customers" (4).**
  - **Recent Activity: Includes tables for "Recent Bookings" and "Recent Feedback".**

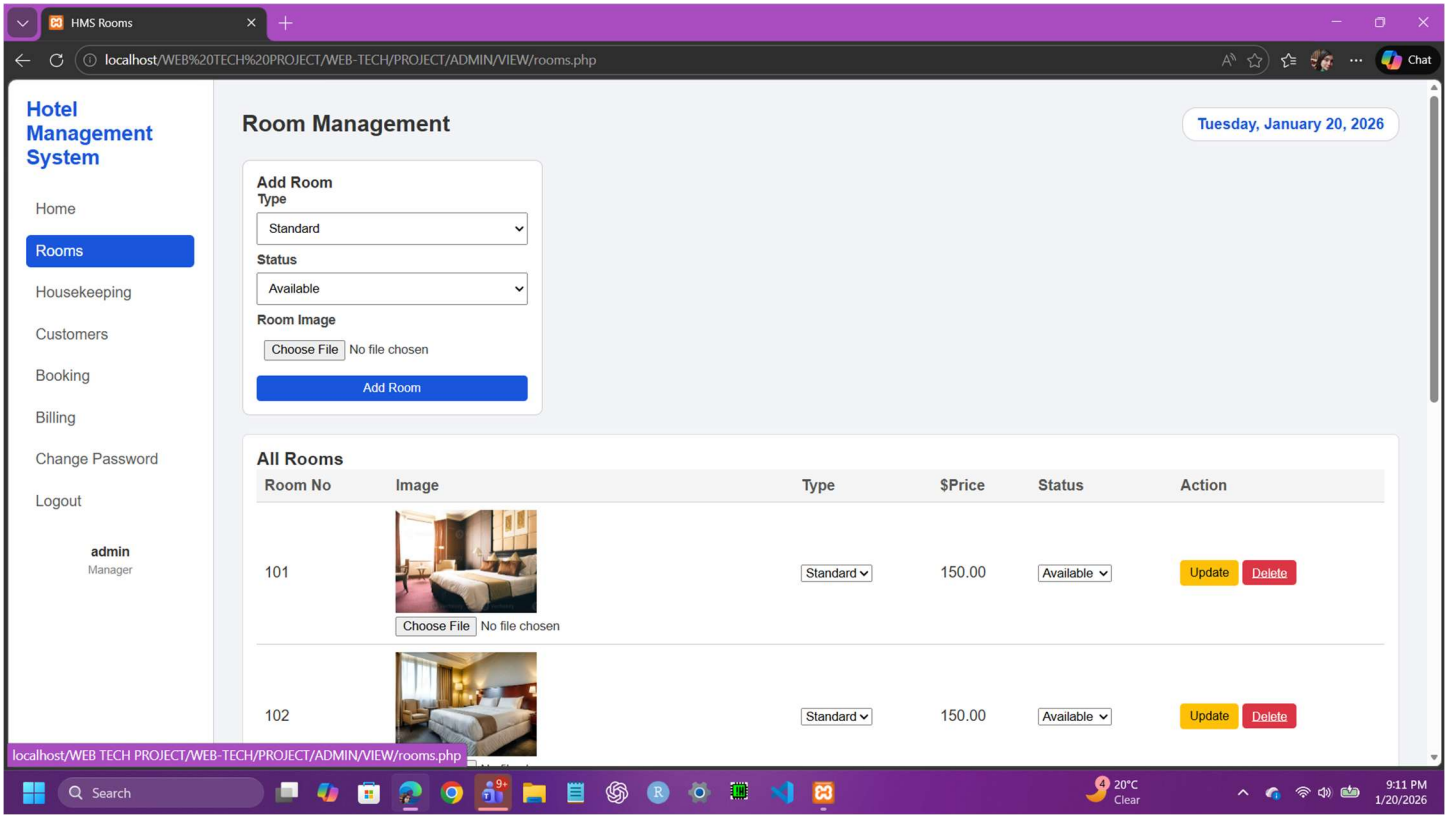


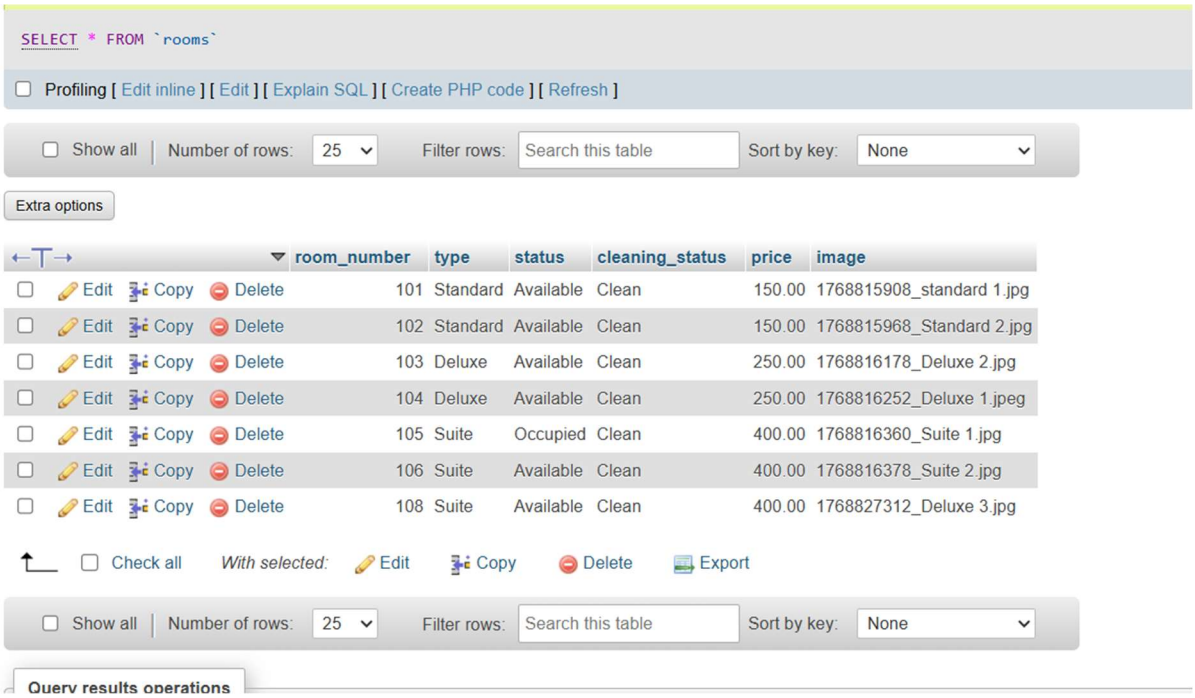


D. Room Management

A dedicated page for handling hotel inventory.

- **Key Features:**
  - **Add Room:** Form to input room type (Standard, Deluxe, Suite), price, and upload a room image.
  - **Inventory List:** A table showing all rooms with their number, type, status (Available/Occupied), and actions to "Update" or "Delete".





SELECT * FROM `rooms`

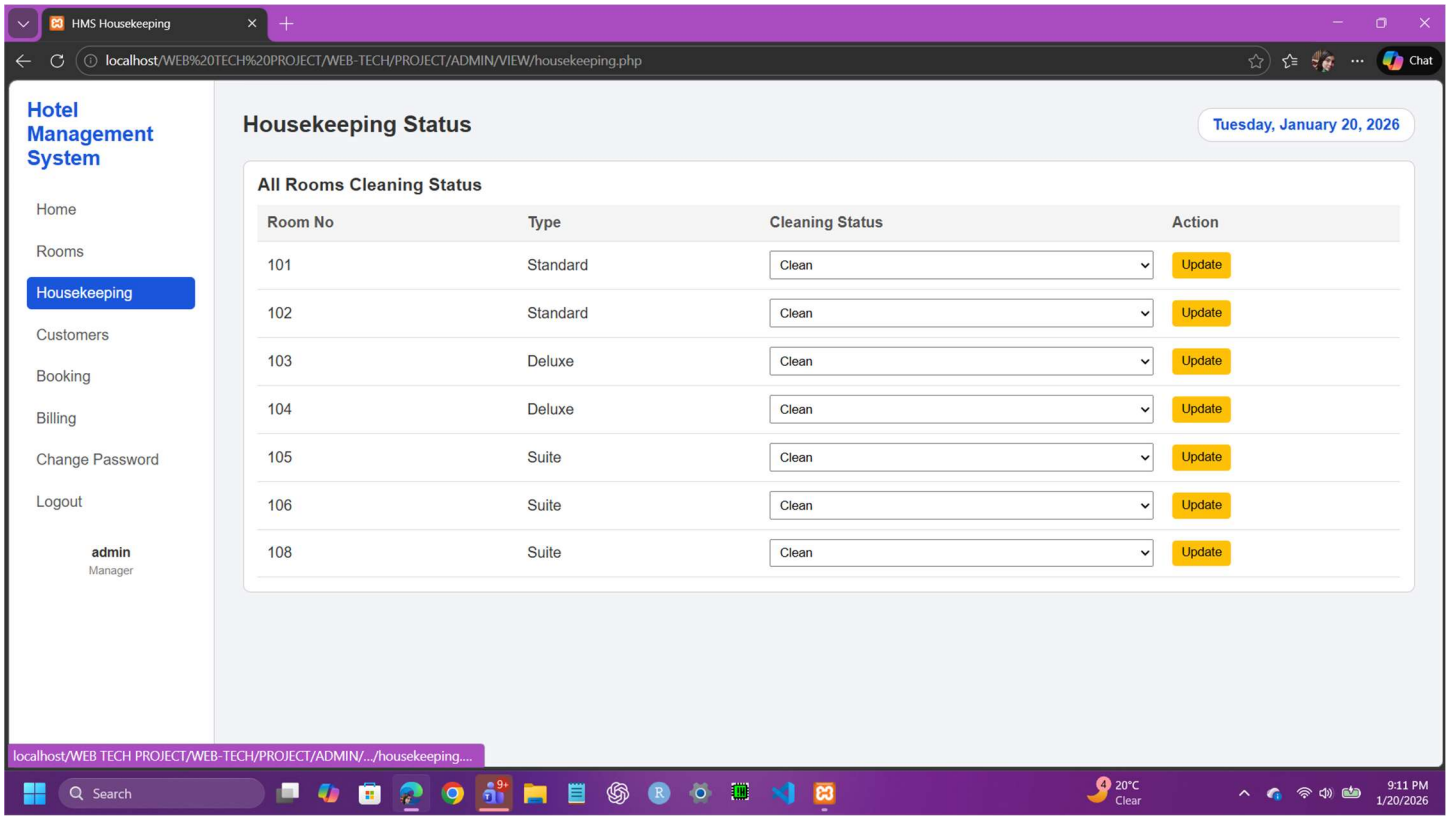
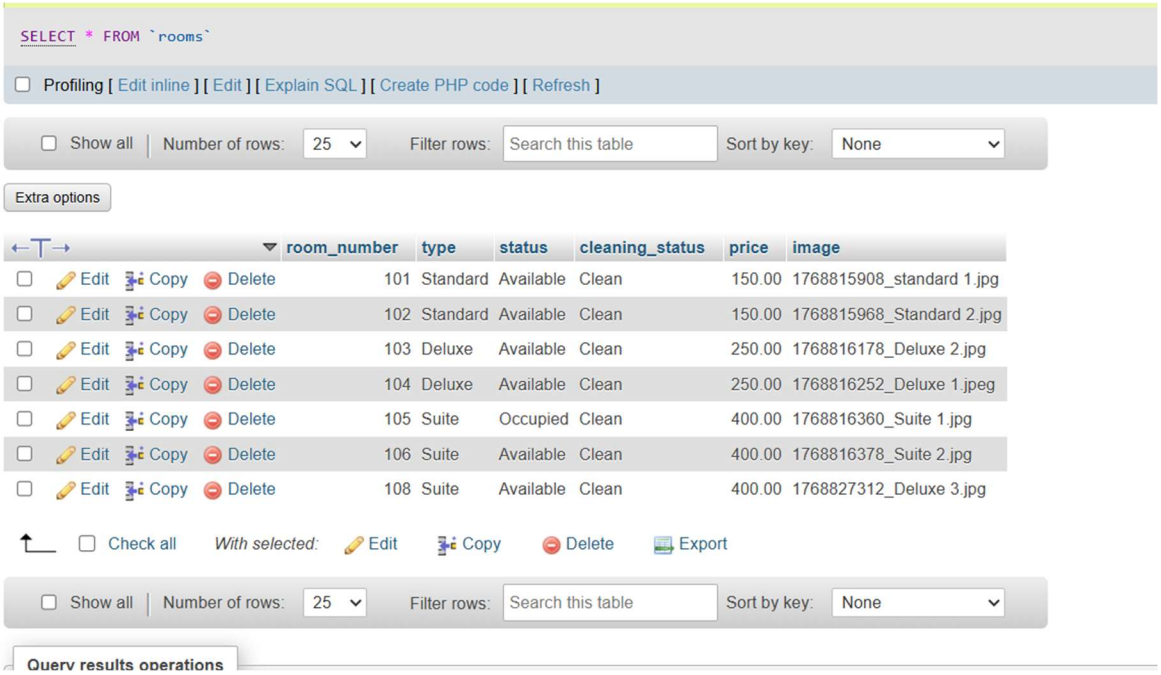
Query results operations

E. Housekeeping Status

Allows staff to track and update the cleanliness of every room.

- **Key Features:**
  - **Status Tracking:** A table listing all rooms (101–108) and their current "Cleaning Status" (e.g., "Clean",”Dirty”,”In Process”,”Maintenance”).
  - **Quick Updates:** Action buttons to change the status after a room has been serviced.

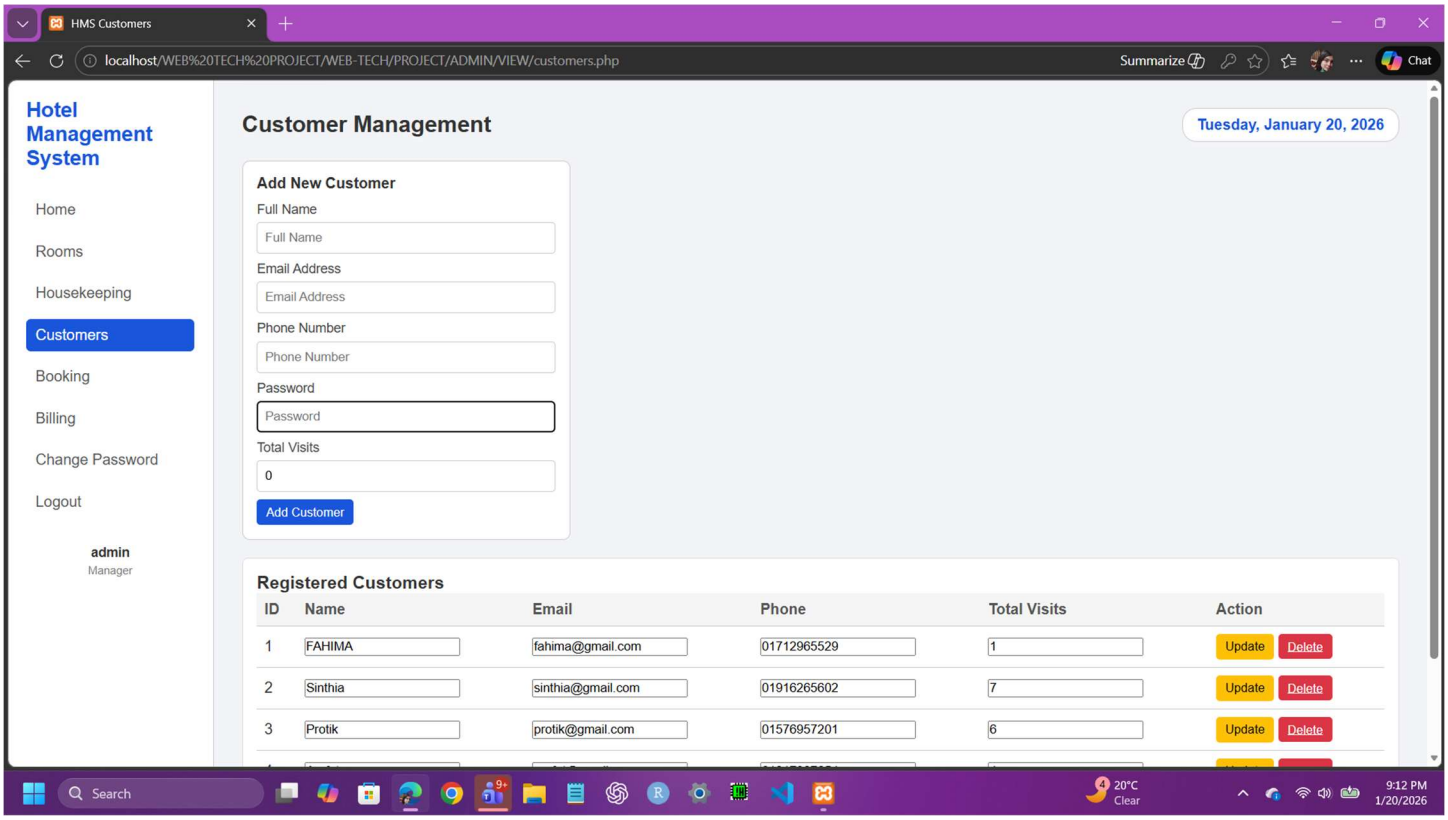


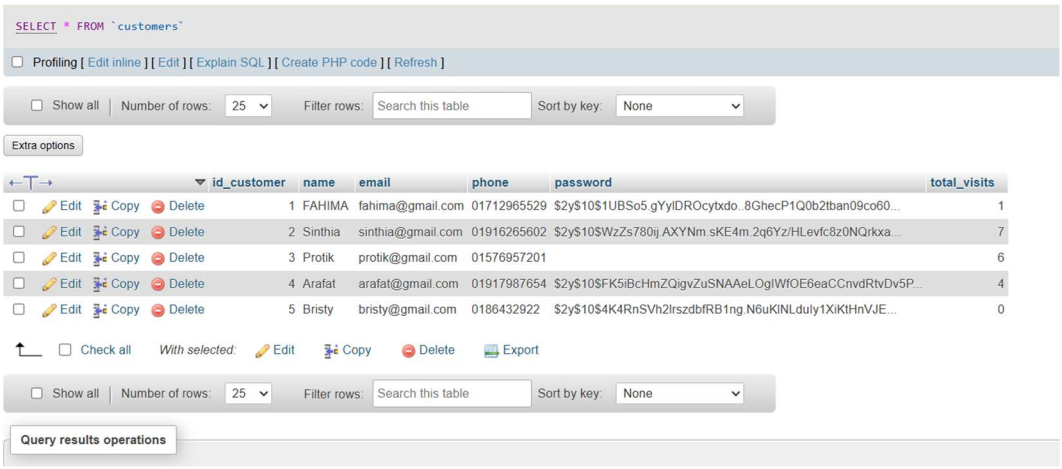


F.Customer Management Page

The Customer Management page is dedicated to handling guest profiles and registration data.

- **New Customer Registration**: Includes a form to manually "Add New Customer" with fields for "Full Name," "Email Address," "Phone Number," and "Password".
- **Guest Directory**: A "Registered Customers" table lists all guests by a unique ID, showing their contact information and "Total Visits" to the hotel.
- **Loyalty Tracking**: The "Total Visits" column helps the manager identify frequent guests, such as one guest having 6 recorded visits.
- **Data Management**: Like the rooms page, it provides "Action" buttons to update customer details to ensure the database remains current & delete button to remove .

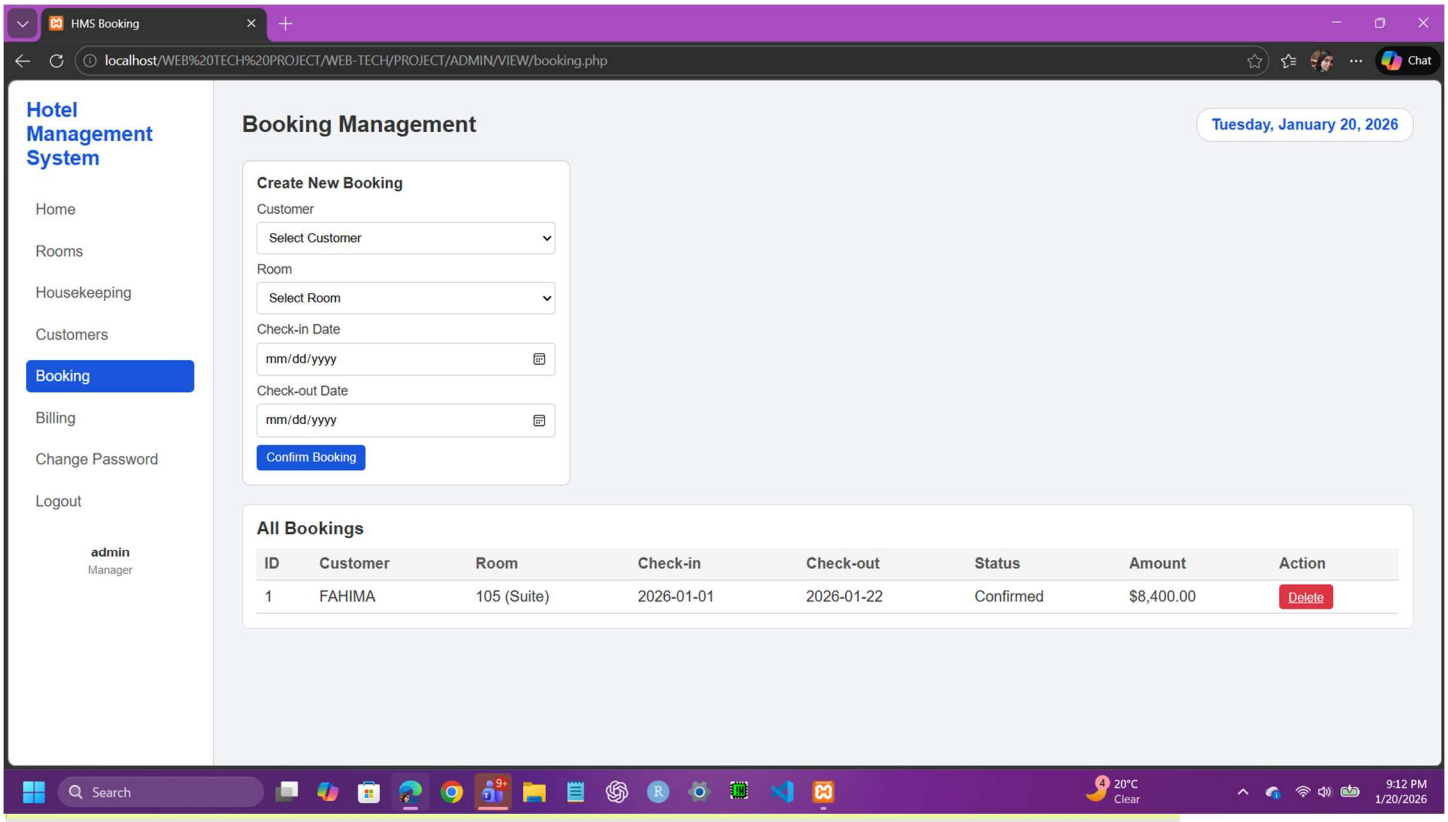


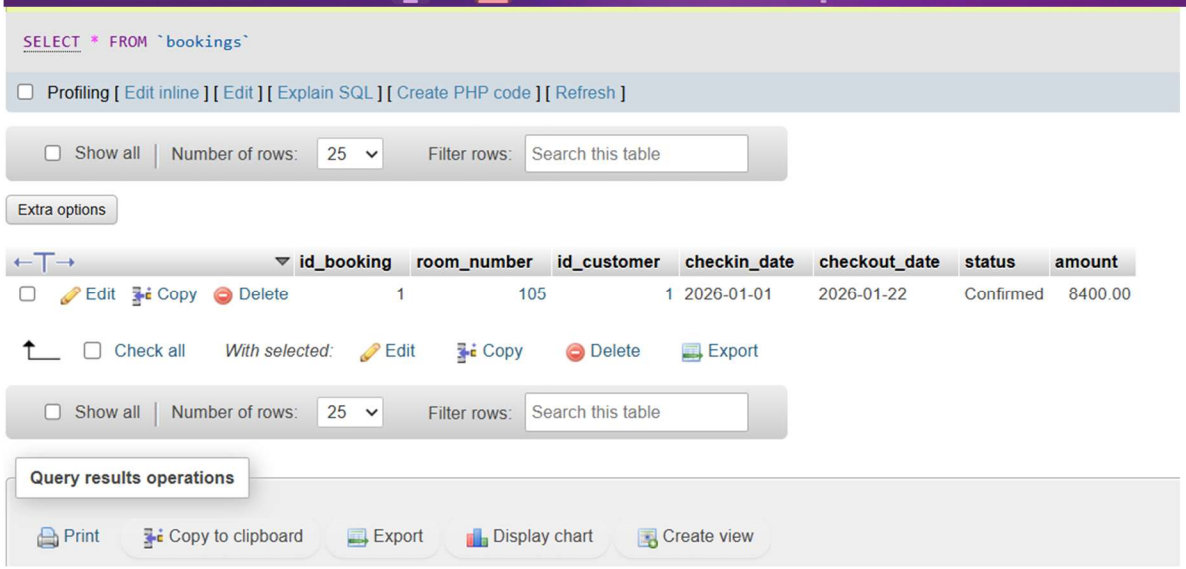


G.Booking Management Page

This page facilitates the reservation process and tracks guest stays.

- **Booking Creation:** The admin can create a new reservation by selecting a "Customer" and a "Room" from dropdown menus.
- **Stay Duration:** It includes date pickers for both "Check-in Date" and "Check-out Date".
- **Reservation Tracking:** The "All Bookings" table displays critical information such as the Booking ID, Room number (e.g., 105 Suite), and stay dates.
- **Status and Revenue:** It tracks the "Confirmed" status of a booking and calculates the total "Amount" due, such as $8,400.00 for a long-term stay.

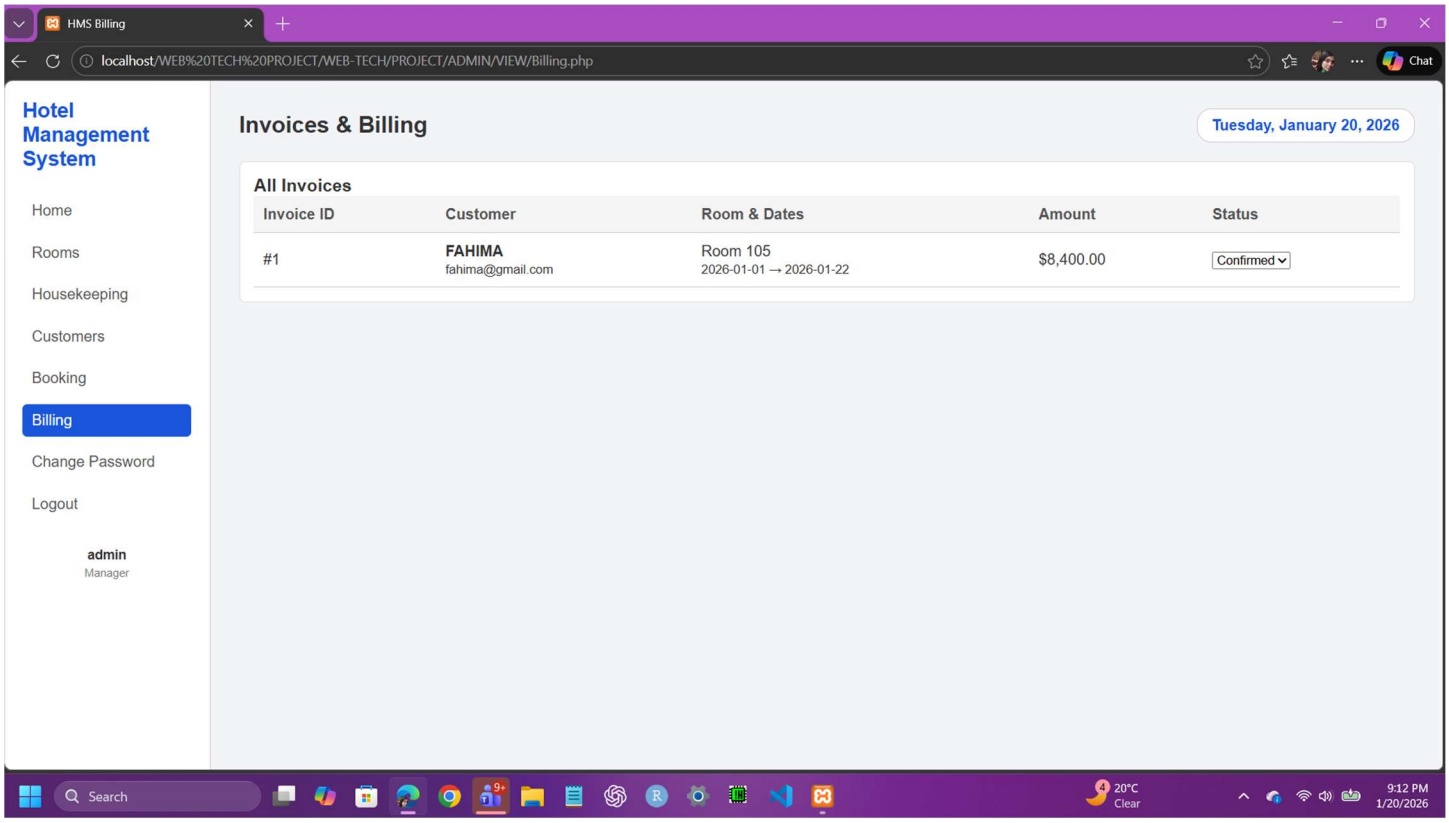




H.Invoices & Billing Page

The billing interface manages the financial transactions and records for every guest stay.

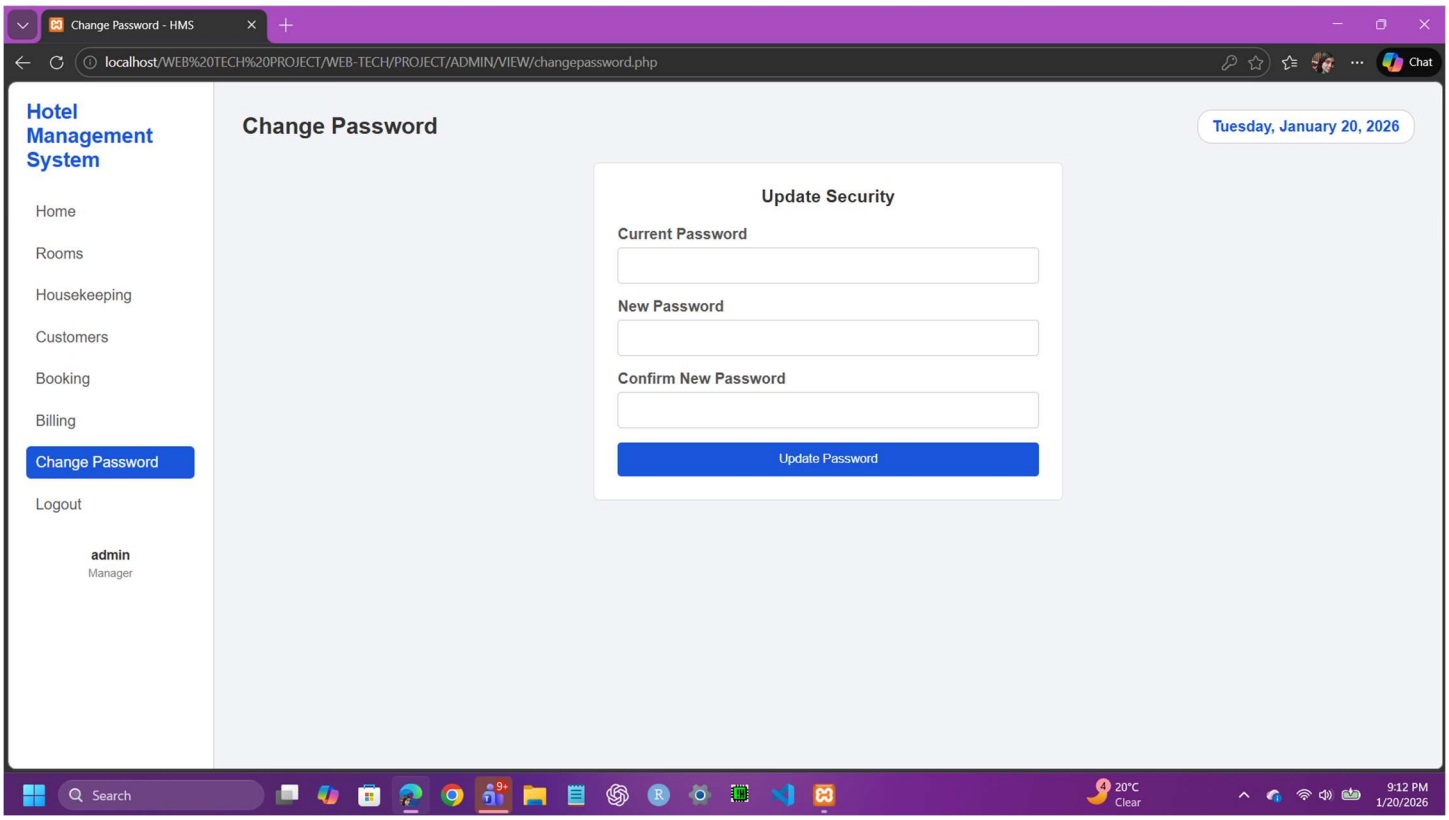
- **Invoice Overview:** The "All Invoices" table provides a snapshot of the Room Number and specific dates associated with a bill.
- **Guest Details:** Each invoice is linked to a customer profile, displaying their name (e.g., FAHIMA) and email address for easy reference.
- **Financial Tracking:** It clearly lists the total "Amount" charged and the payment "Status" to ensure revenue is accounted for.
- **System Navigation:** Like other admin pages, it includes a search bar and a sidebar for quick access to customer and room data



I.Change Password

The Change Password interface is built to ensure the security of the administrative account through a straightforward update process.

- **Update Security Form:** The page features a "Update Security" section with three primary input fields: "Current Password," "New Password," and "Confirm New Password".
- **Validation Action:** It includes an "Update Password" button to submit the changes and synchronize with the database



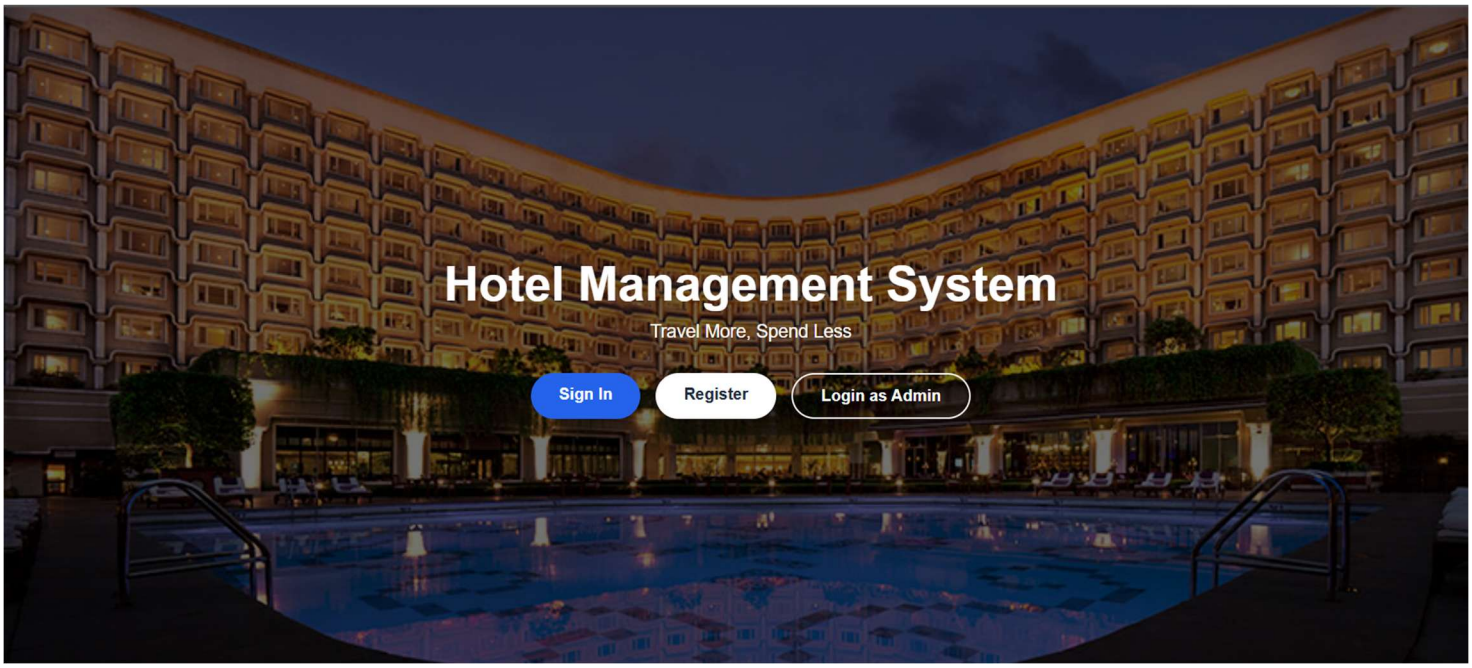
USER:

A. Homepage

The homepage serves as the primary landing page for users with a clean, modern interface featuring a hotel background and the tagline "Travel More, Spend Less".

Key Features

- Options to "Sign In," "Register," or "Login as Admin".



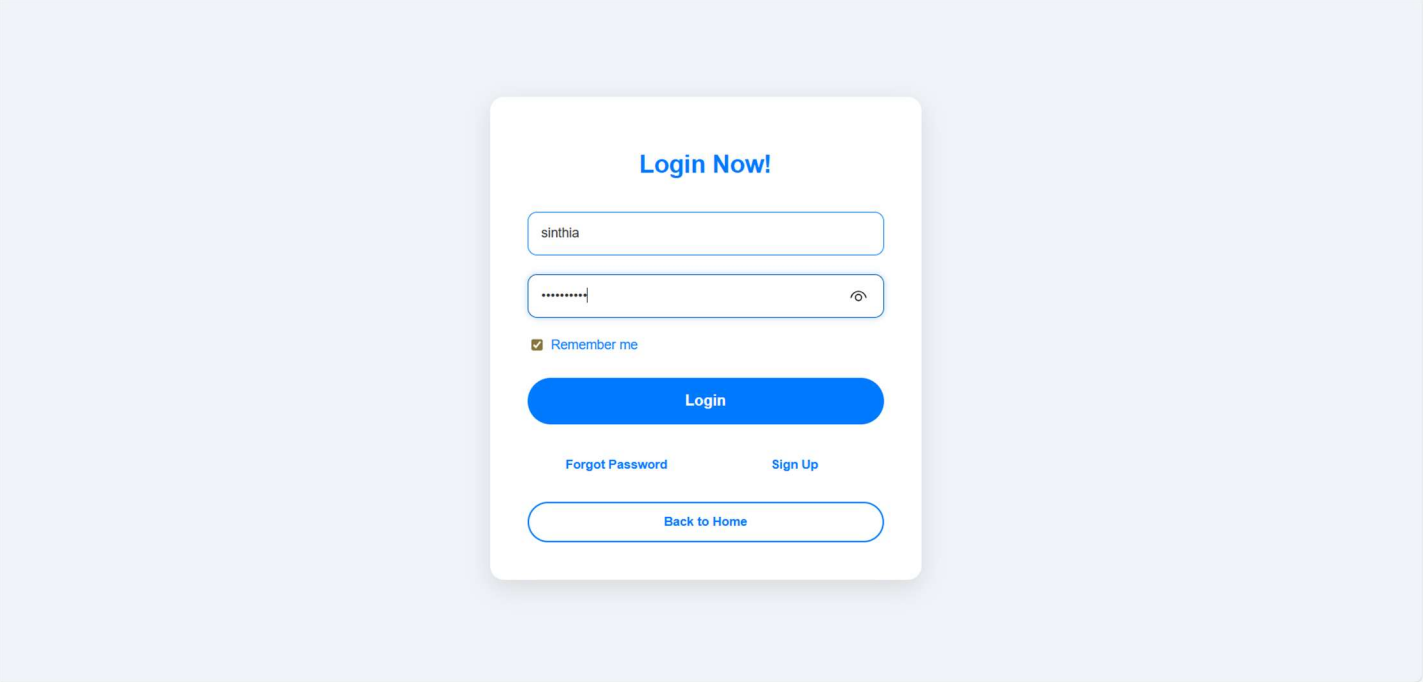
B. Login

Key Features

- Username and Password fields for login
- Remember Me option
- Forgot Password link
- Sign Up button
- Back to Home button

Functionality

- Provides secure access to the user account
- Keeps users logged in when “Remember Me” is selected
- Allows users to recover their password if forgotten



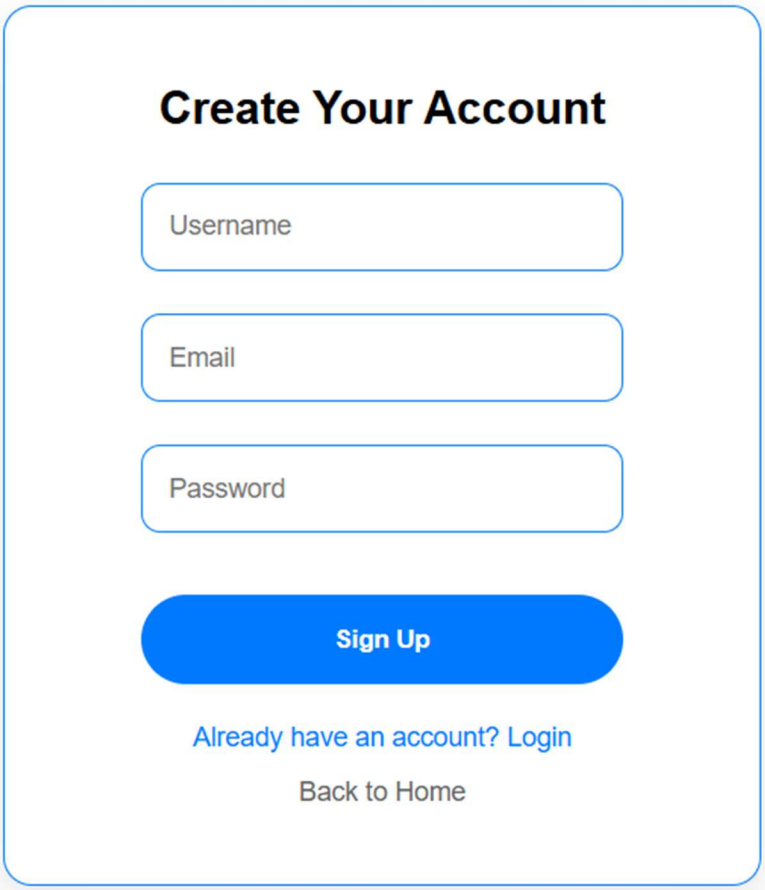
C. Signup

Key Features

- Fields for Username, Password, and Email
- Secure registration process
- Option to access the system after signup

Functionality

- Allows new users to create an account securely
- Stores user information in the system for authentication



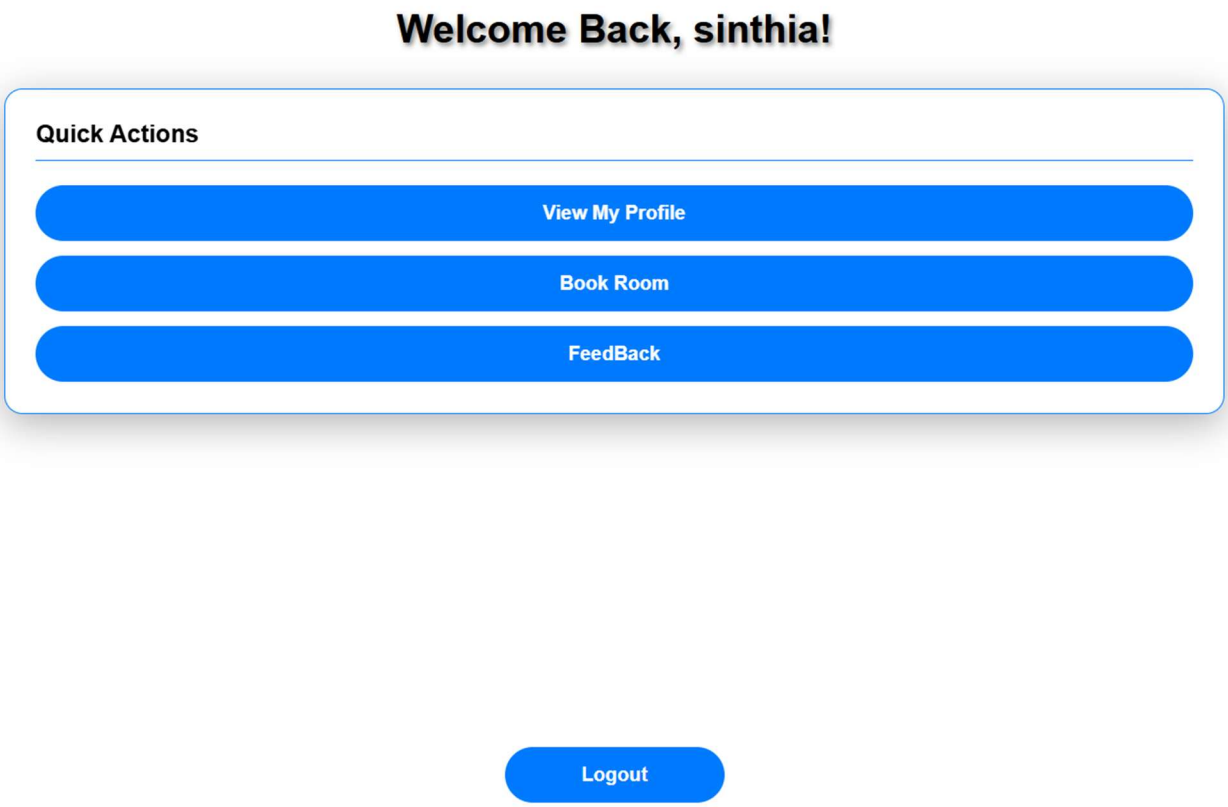
D. DashBoard

Key Features

- View Profile button
- Book Rooms button
- Feedback button

Functionality

- Allows users to view and manage their personal information
- Enables users to book rooms directly from the dashboard



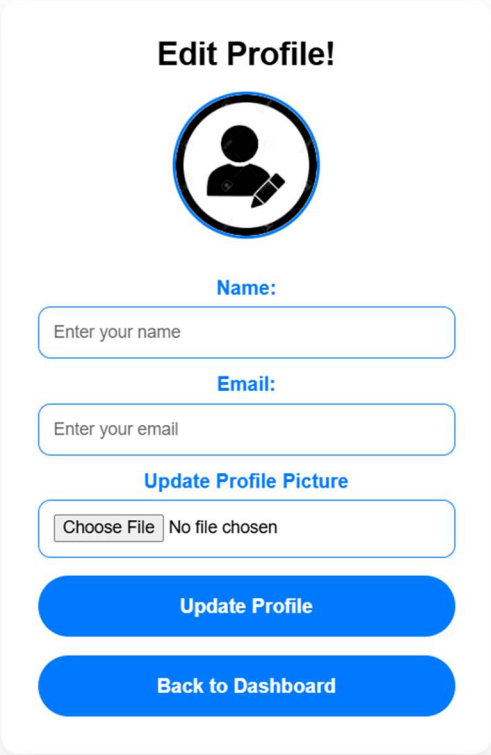
E. Edit Profile

Key Features

- Fields to edit Name and Email
- Option to update Profile Picture

Functionality

- Allows users to update their personal information
- Ensures the profile remains accurate and up to date



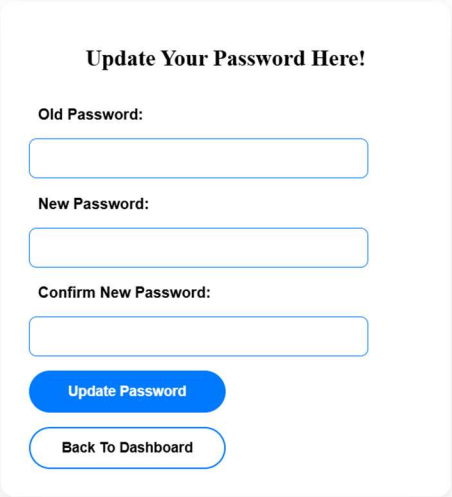
F. Update Password

Key Features

- Fields for Old Password, New Password, and Confirm Password
- Secure password update option

Functionality

- Validates the old password before updating to prevent unauthorized access



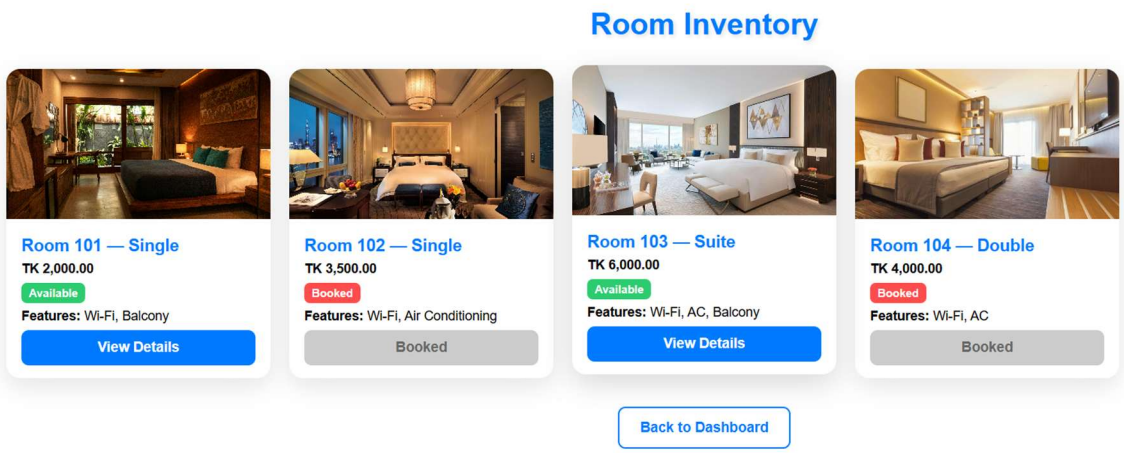
G. Room Inventory

Key Features

- Displays all rooms with features and details
- Booked or Available status for each room
- User-friendly interface for browsing room options

Functionality

- Allows users to view room details before booking



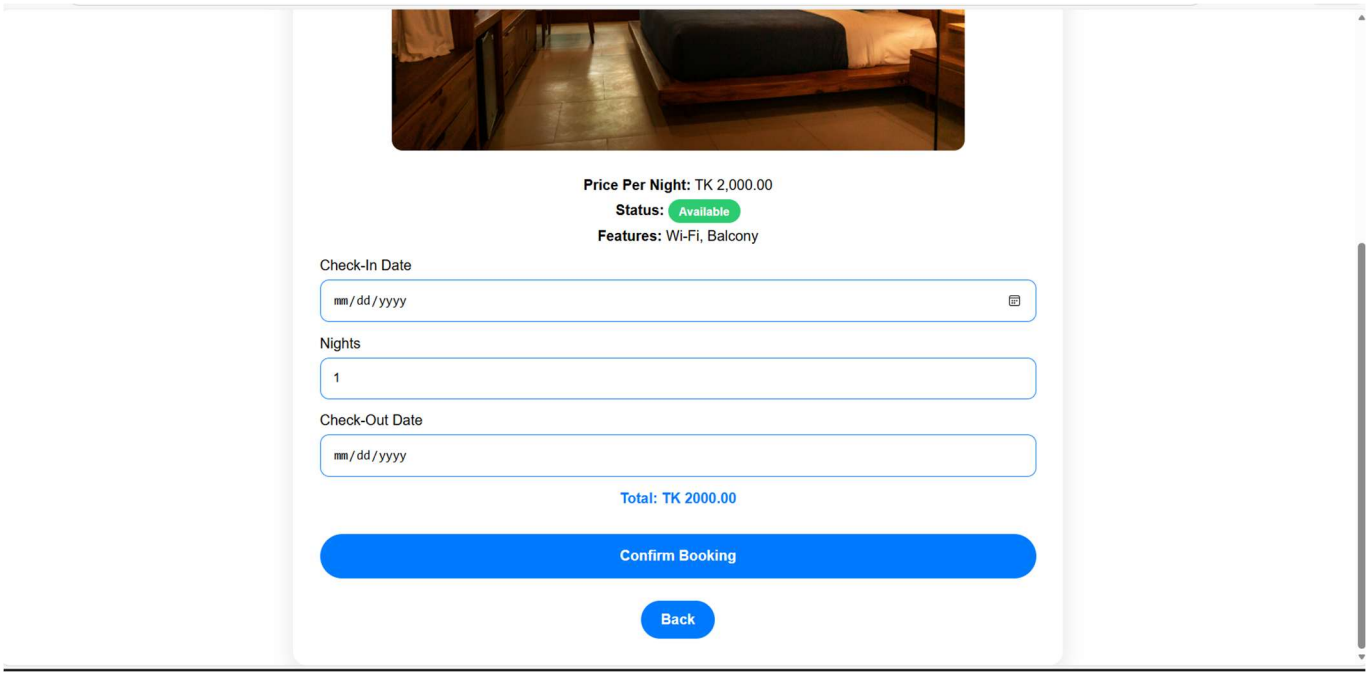
H. Room Booking

Key Features

- Fields to select Check-in and Check-out dates
- Automatic calculation and display of the total amount

Functionality

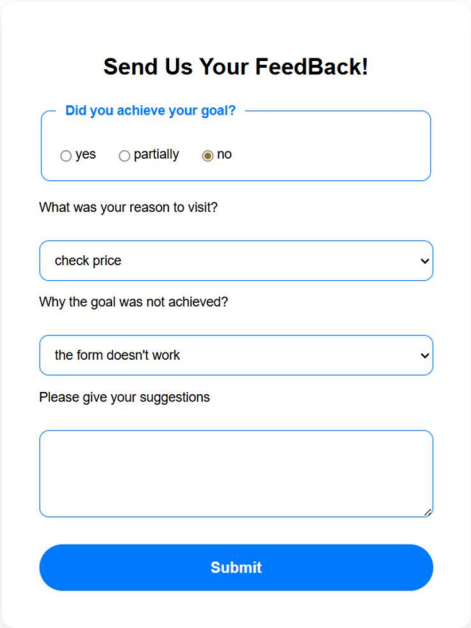
- Allows users to reserve rooms by selecting their stay dates
- Automatically calculates the total cost for the selected period



I. FeedBack

Key Features:

- Field to enter Reason for Visit
- Option to indicate if Goals Were Achieved
- Field for Suggestions

Functionality:


- Allows users to provide feedback about their stay
